Long-Term Care
DATA COOPERATIVE

The Long-Term Data Cooperative provides researchers only the data required to execute their research goals and aims as approved by their IRB. Standard Domain files are available at no cost to the researcher, while cohort customizations (outlined below) are completed at the cost of the researcher. Customization requirements are defined by researcher (e.g., identification of diagnoses, medications, facility restriction).

LTCDC Cohort Customization Offering	Cost (per Unit)	Annual Cost
LTCDC EHR-only Research		
Initial Domain Cohort Customization (e.g. EHR sample restricted by demographic category, diagnoses; medications/vaccinations, other clinical variables, or facility.	$4,000	$4,000
Subsequent Cohort Customization (e.g. expansion of cohort definition)	$2,000	
Monthly Cohort Update (no change to initial customization) per cut		
first year	$1,250	$13,750
subsequent years		$15,000
Quarterly Cohort Update (no change to initial customization per cut		$1,250
first year	$1,250	$3,750
subsequent years		$5,000
Technical Programming Support - pricing available upon request		
LTCDC EHR-linked with CMS Data Research		
Initial Domain Cohort Customization (e.g. EHR sample restricted by demographic category, diagnoses; medications/vaccinations, other clinical variables, or facility.	$4,000	$4,000
Subsequent Cohort Customization (e.g. expansion of cohort definition)	$2,000	
Monthly Cohort Update (no change to initial customization) per cut		
first year	$1,750	$19,250
subsequent years		$21,000
Quarterly Cohort Update (no change to initial customization per cut		$1,250
first year	$1,750	$5,250
subsequent years		$7,000
Technical Programming Support - pricing available upon request
